

Paper Jack Nano

Cleanliness and hygiene are particularly important in the food industry. Our products are specially designed to meet the demanding requirements of this industry. By removing all small parts, our paper jack dispenser is well suited to an environment where contamination risks must be minimised. The durable and easy to

clean nano-surface coating means that germs and bacteria do not stick. As already certified by PMV, our blue paper towels satisfy the requirements set out by the Council of Europe Resolution (ResAP(2002)1) and the Federal Institute for Risk Assessment. They are also suitable for direct contact with food.
